Change Server Visibility

Before following these steps, make sure to stop your server first. This is to avoiding breaking anything on your server while you edit.

Step 1: Head to your game panel and look for your **File icon** on the left hand side.
// Photos to be added on AH 2.0

Step 2: When you are in you files, scroll down until you see a file named: **serverconfig.xml**
// Photos to be added on AH 2.0

Step 3: Open the file and look for the line that says: **<property name="ServerVisibility" value="2"/> .** When you have found this line, you just need to edit the number in the Value area.

Before:
<property name="ServerVisibility" value="2"/> <--- Server is Visible to the public.

After:
<property name="ServerVisibility" value="1"/> <--- Server is only Visible to friends.

There are 3 settings for Server Visibility ranging from 0 to 2.
Each number has its own setting:

0 = Not Listed (Server will not show to anyone. Can only connect with IP Address)

1 = Only shown to friends (Server will become visible to you friends if a player join the server with the IP Address)

2 = Public (Server is visible to the public)

//Photos to be added on AH 2.0

> **Make sure to save before exiting the file**.

> **After Completing these steps, you can now go and start you server.**

//Photos to be added on AH 2.0
