

How to configure domain on Cloudflare

Make sure to have purchased a domain with your registrar.

1. A Record

When on Cloudflare, on the left you got a sidebar, click on DNS and then go to "Records"

Then create your A record

In the "**type**" box select "**A**"

In the "**Name**" slot you can put numbers, letters or "@"

You may be wondering what is the name slot, we can say it's your domain prefix.

Example: I own Example.net, if I set "name" to **play** I have to put play.example.net to join my minecraft server

Else, if I put @ in there, I can join with example.net

In "**IPv4**" slot you will put your server's numerical ip

You may be wondering "how do I find it, it's showing a subdomain" to which I will answer with:
there is [this tutorial](#)

play.alien-host.net points to 127.0.0.1.

Type	Name (required)	IPv4 address (required)	Proxy status	TTL
A	play	127.0.0.1	<input checked="" type="checkbox"/> DNS only	Auto
<small>Use @ for root</small>				

2. SRV Record

You may want to set this up if your port is **not** [25565](#)

Create a second record

Make sure the "Type" is SRV and not A

In the "name" slot you put the same words you've done for your A record E.g. @, mc, play

In "**service**" slot put "**_minecraft**" (without the quotation marks)

"**TTL**" should be "**Auto**"

"**Priority**" should be a low number e.g. 0 or 1

"**Weight**" should be below 5

"**Port**" is your server port, which can be found [in the console](#)

"**Target**" has to be set to your domain/alias shown in the panel (view picture below)

_minecraft._tcp.play.alien-host.net points to e-de-001.alienhost.net and listens on _tcp port 25581 for _minecraft services.

Type	Name (required)	Service (required)	Protocol (required)	TTL	Priority (required)
SRV	play	_minecraft	TCP	Auto	1
<small>Use @ for root</small>		<small>E.g. _servicename</small>			<small>0 - 65535</small>
Weight (required)	Port (required)	Target (required)			
1	25581	e-de-001.alienhost.net			
<small>0 - 65535</small>	<small>0 - 65535</small>	<small>E.g. www.example.com</small>
