# How to get numeric IPv4

As you might have noticed in your Panel, your server does not contain a **IPv4** ,just an alias which could look like **e-de-001.alienhost.net** while this is easier to read and remember it is unfortunately not always usable in certain configurations and settings, with this guide we will show you how to use the given **alias** and turn it into numeric **IPv4:**
1. Navigate to the following **website.**
2. You will be prompted with a screen similar to this:

3. In the field saying **Domain Name** insert the visible alias of your server

To

and click the button **Find DNS records.**
4. You will be prompted with a similar result to this:

DNS records for **e-de-001.alienhost.net**

Cloudflare   Google DNS   OpenDNS   Authoritative   Local DNS ˅

The Cloudflare DNS server responded with these DNS records. Cloudflare will serve these reco
this period, Cloudflare will update its cache by querying one of the authoritative name servers

A records

IPv4 address	Revalidate in
⊞ 195.201.85.213	5m

Where you can see the **IPv4** of your server. In this case, **195.201.85.213**.

Great! Now you have your IPv4 and you are ready to use it.
