SFTP

- Filezilla
- WinSCP

Filezilla

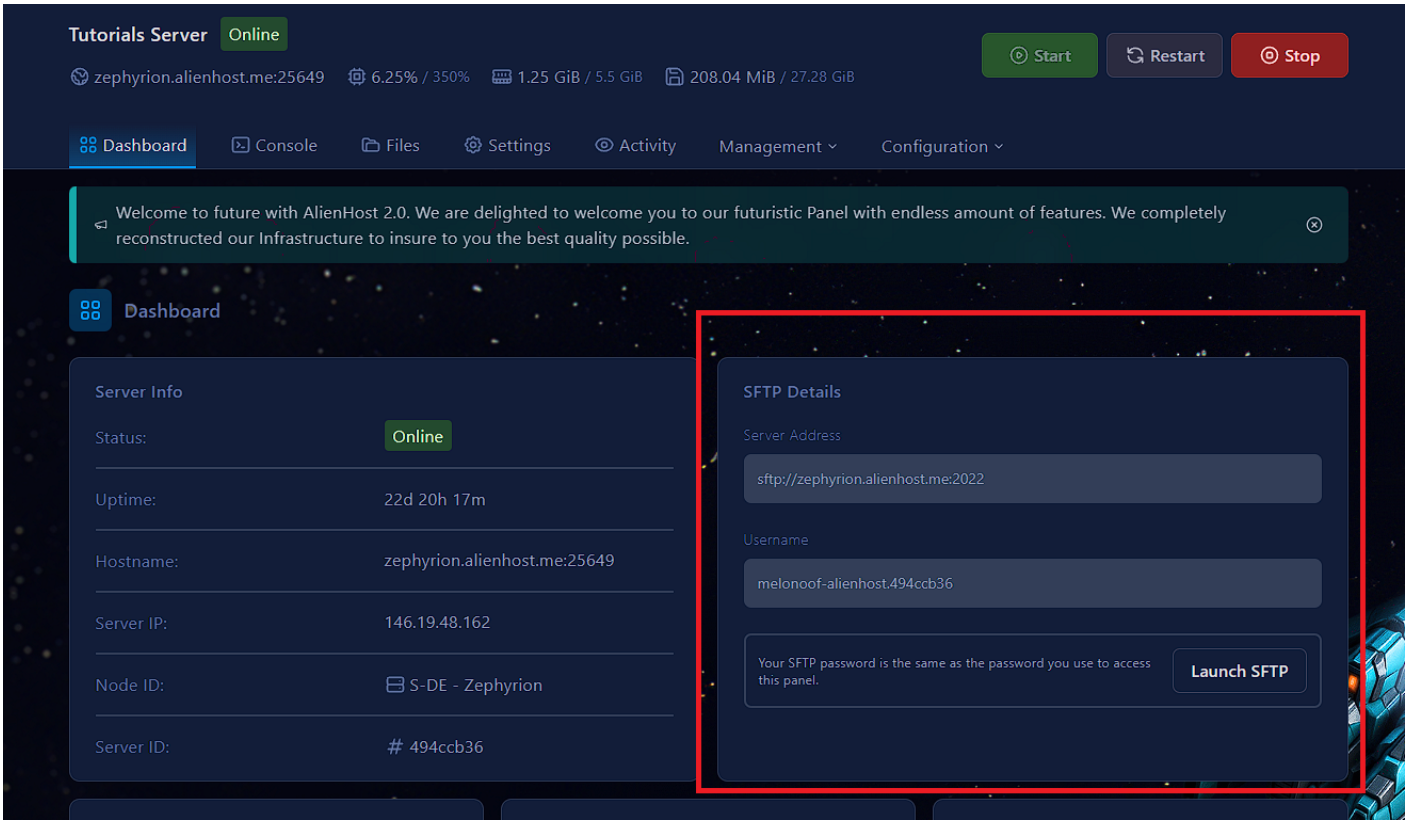

1. Download

Download Filezilla (Client) by clicking here

---

2. Getting credentials

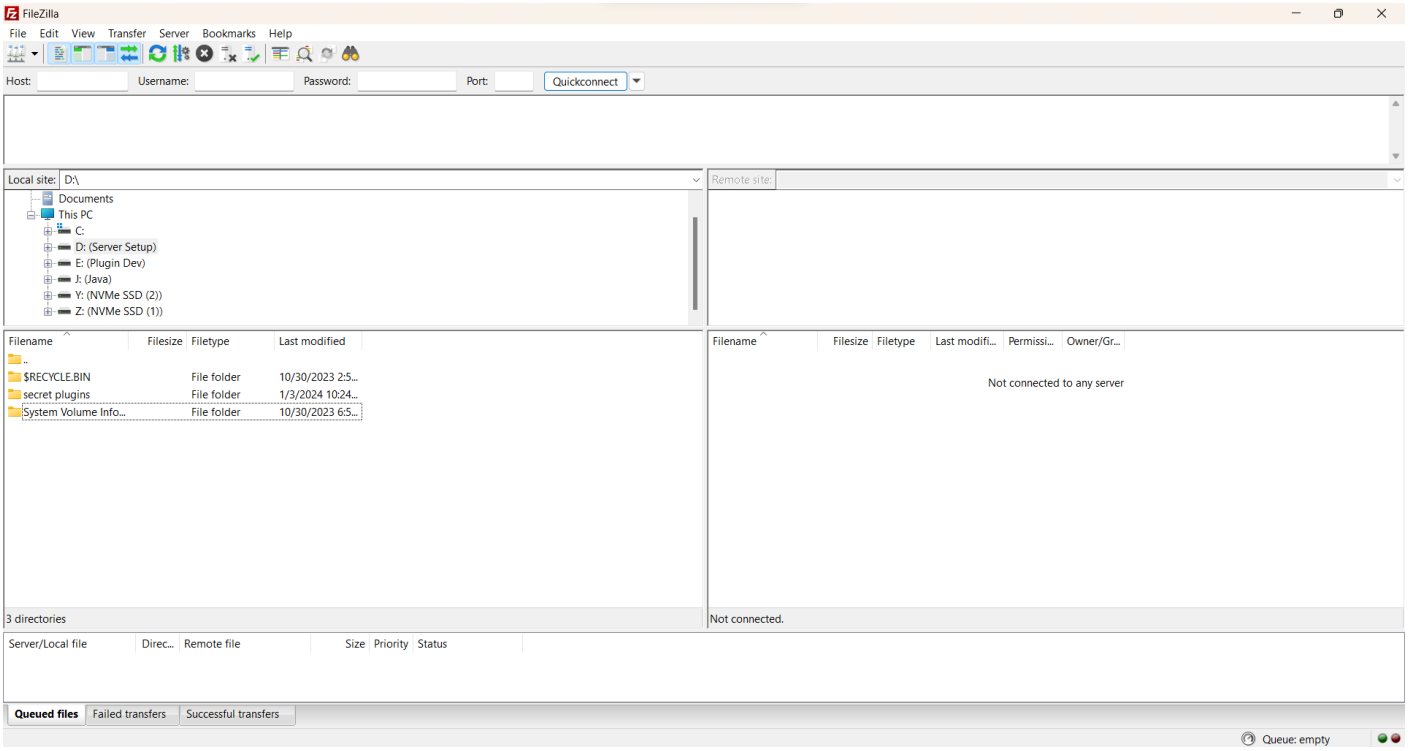

Head to the settings tab of the server(s) you want to transfer files to

---

3. Connecting

Now start Filezilla, it's going to look somewhat like this:

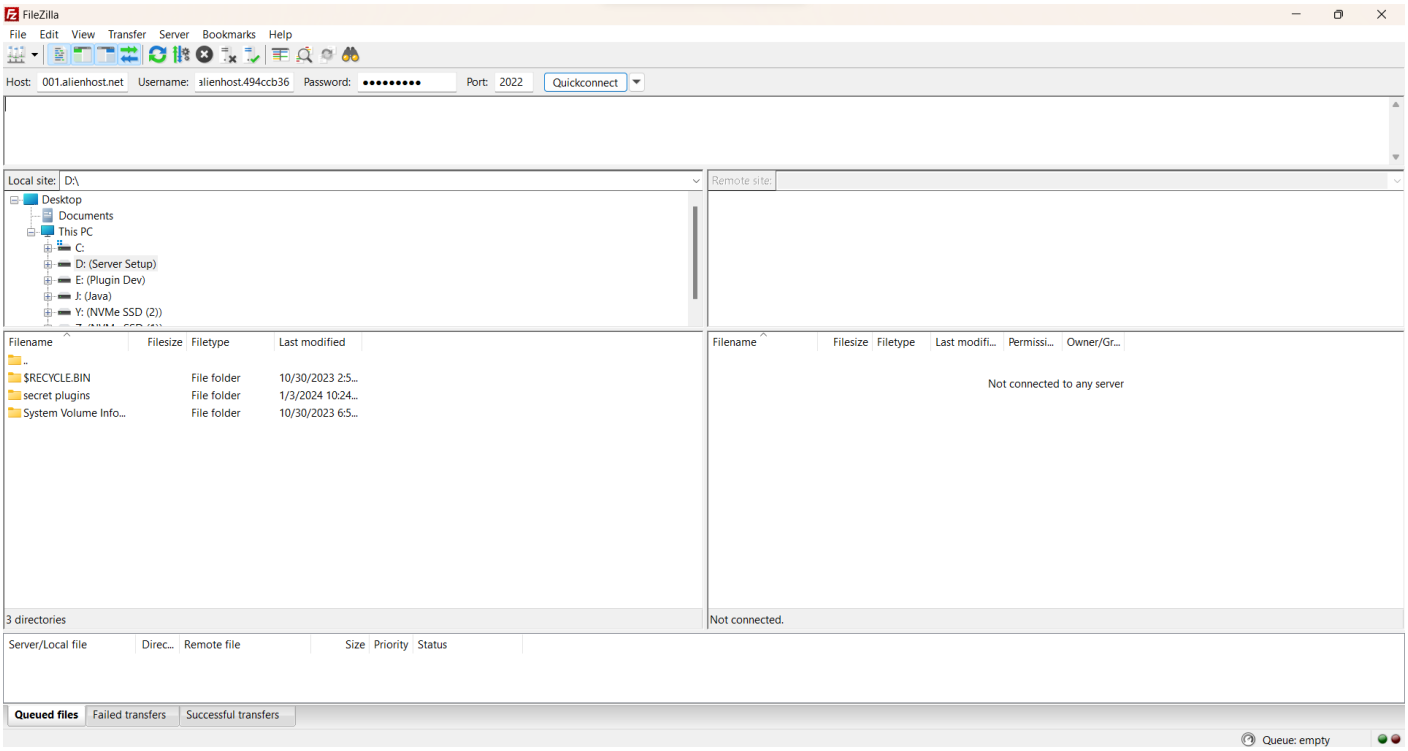

In the host slot, enter the server address without the ":2022" (refer to the image in step 2)

In the username slot you put the user name (refer to the image in step 2)

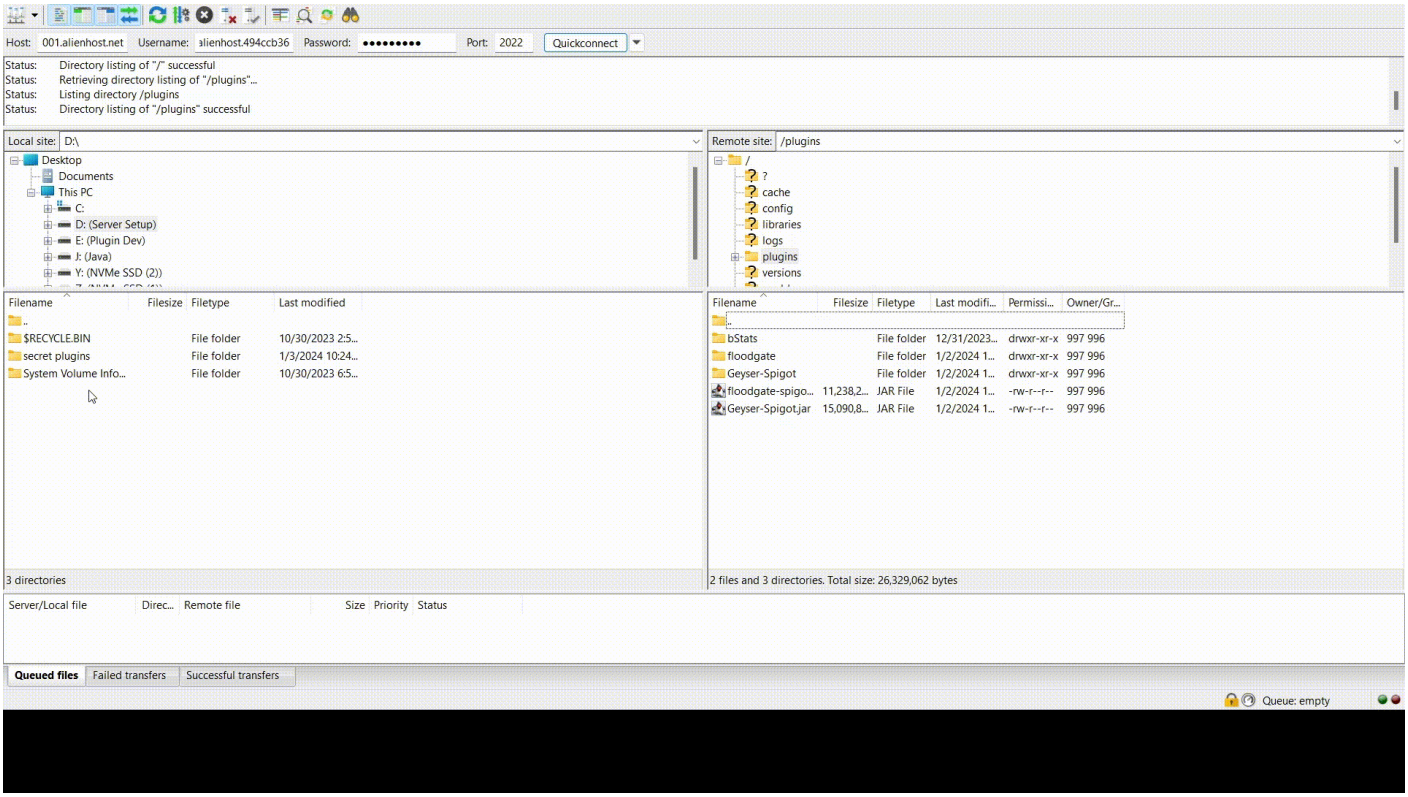

In the password slot you put your panel's password

In the port slot you put "2022"

Should look like this:

Now click "Quickconnect" and drag & drop the files you want to transfer

> Make sure to drag it in the correct folder/directory

WinSCP

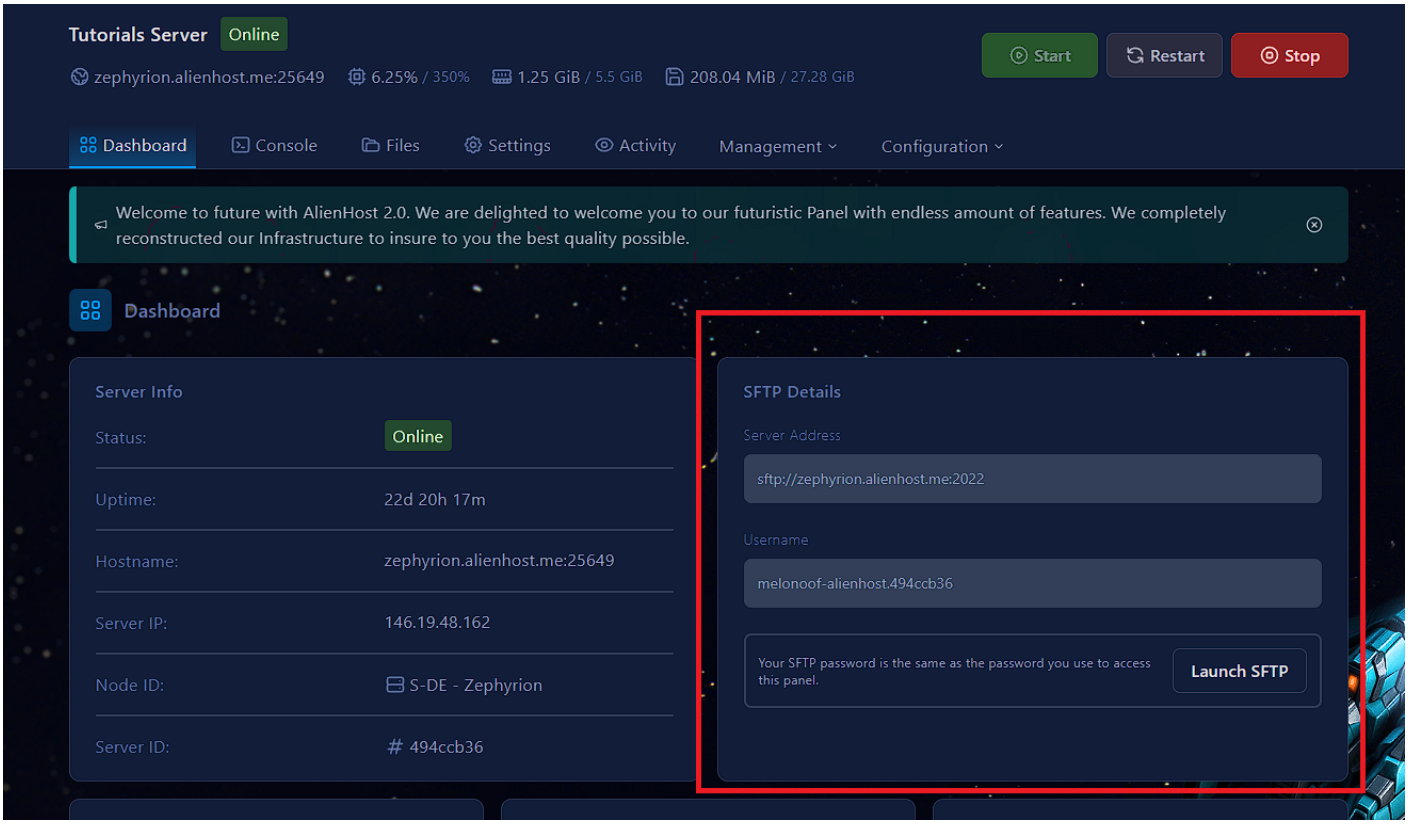

1. Download

Download WinSCP

---

2. Getting credentials

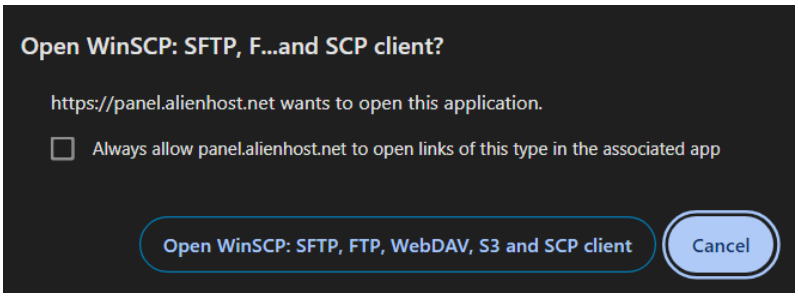

Head to the settings tab of the server(s) you want to transfer files to

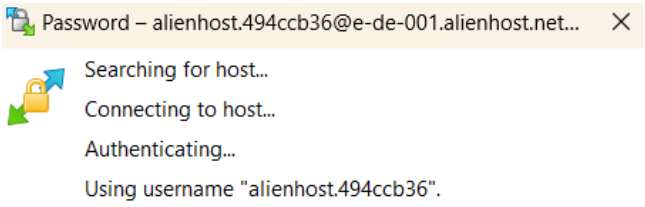

---

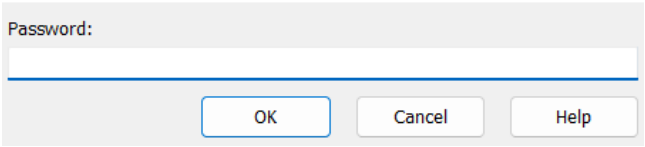

3. Connecting

Connect by clicking Launch SFTP, a popup will appear on your screen.

Click on "Open WinSCP"

Put in your panel's password and click "Ok"

Now you should be connected (if the password was correct).

3a. How to transfer files

Select the file you want to transfer by left clicking on it, wait 1 or 2 seconds, now click on it again and drag it in the correct directory. You successfully transferred a file!
