

WinSCP

1. Download

Download [WinSCP](#)

2. Getting credentials

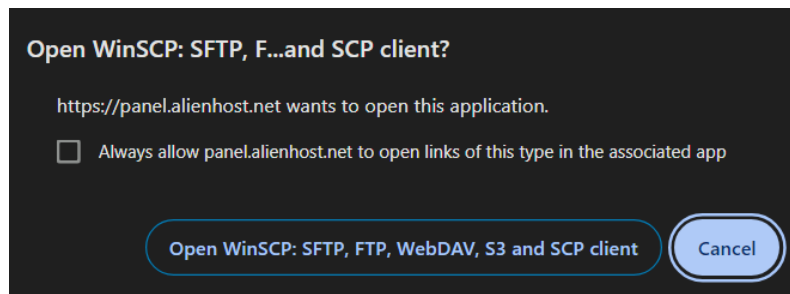

Head to the settings tab of the server(s) you want to transfer files to

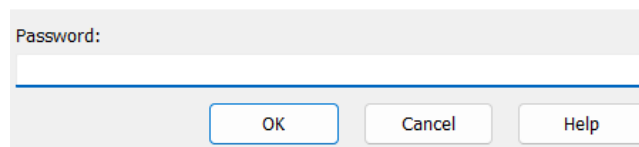

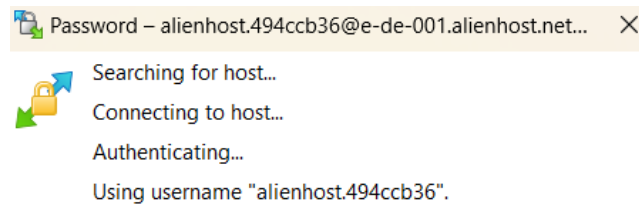

The screenshot displays the AlienHost 2.0 dashboard for a server named 'Tutorials Server' which is 'Online'. The server's status is 'Online' and it has been up for '22d 20h 17m'. The dashboard includes a navigation menu with options like 'Dashboard', 'Console', 'Files', 'Settings', 'Activity', 'Management', and 'Configuration'. A notification banner at the top reads: 'Welcome to future with AlienHost 2.0. We are delighted to welcome you to our futuristic Panel with endless amount of features. We completely reconstructed our Infrastructure to insure to you the best quality possible.' The 'Server Info' section lists details such as Hostname (zephyrion.alienshost.me:25649), Server IP (146.19.48.162), Node ID (S-DE - Zephyrion), and Server ID (# 494ccb36). The 'SFTP Details' section, highlighted with a red border, shows the Server Address (sftp://zephyrion.alienshost.me:2022) and Username (melonooof-alienshost.494ccb36). A note states: 'Your SFTP password is the same as the password you use to access this panel.' A 'Launch SFTP' button is located at the bottom right of the SFTP Details section.

3. Connecting

Connect by clicking Launch SFTP, a popup will appear on your screen.

Click on "Open WinSCP"

Put in your panel's password and click "Ok"

Now you should be connected (if the password was correct).

3a. How to transfer files

Select the file you want to transfer by left clicking on it, wait 1 or 2 seconds, now click on it again and drag it in the correct directory. You successfully transferred a file!
