How to obtain your minecraft client's logs

Guide: How to Pull Your Minecraft Client Logs

This guide will show you how to find and share your Minecraft logs using the default launcher on Windows.

Finding Your Minecraft Logs

For the Default Minecraft Launcher (Vanilla)

Windows

1. Press `Win + R`, type `%appdata%\.minecraft\logs`, and press `Enter`.
2. Locate the log file:
   - **Latest Log:** `latest.log` (for your most recent session).
3. Open the file using Notepad or any text editor.

How to Share Your Logs

If you need help diagnosing issues, you can upload logs using:

- **AlienHost's paste**

Always remove sensitive information like your IP address before sharing logs publicly.
