Installation and usage

Prerequisites

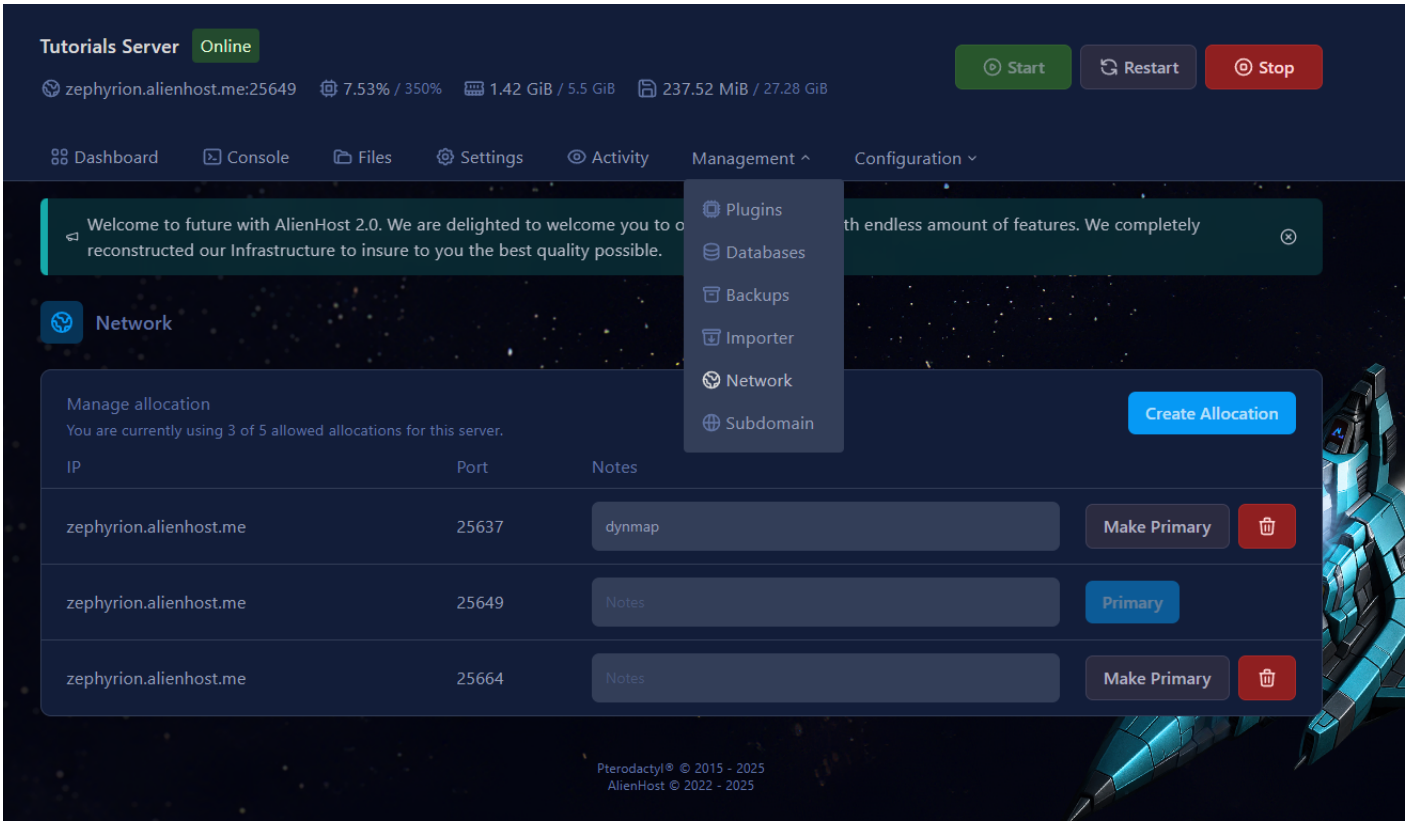

Spigot/Paper 1.10.2+ (This guide makes use of 1.19.4)

Java 11+ (This guide makes use of Java 17+)

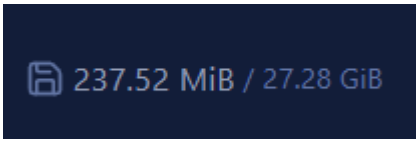

Additional port allocation (In this guide the port is 25663)

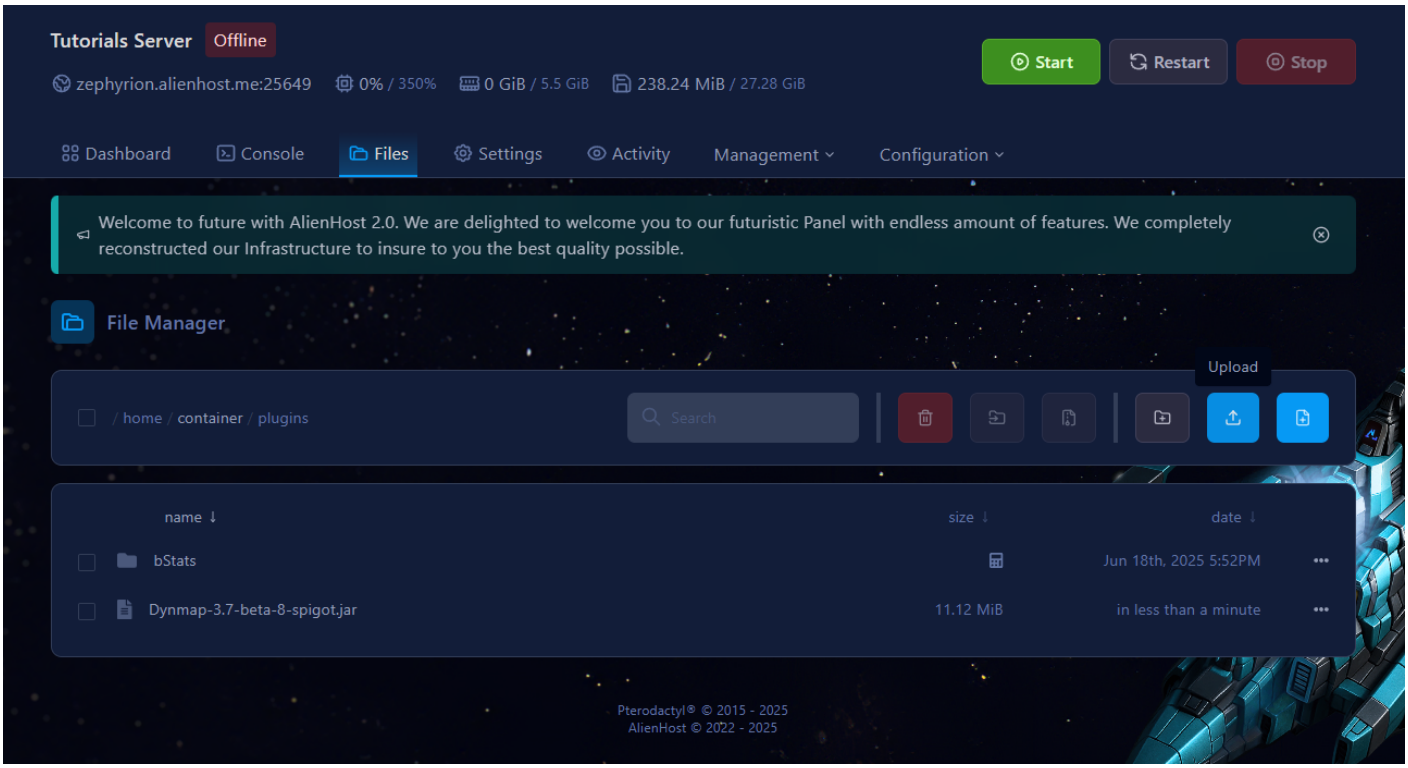

Free storage (a lot)

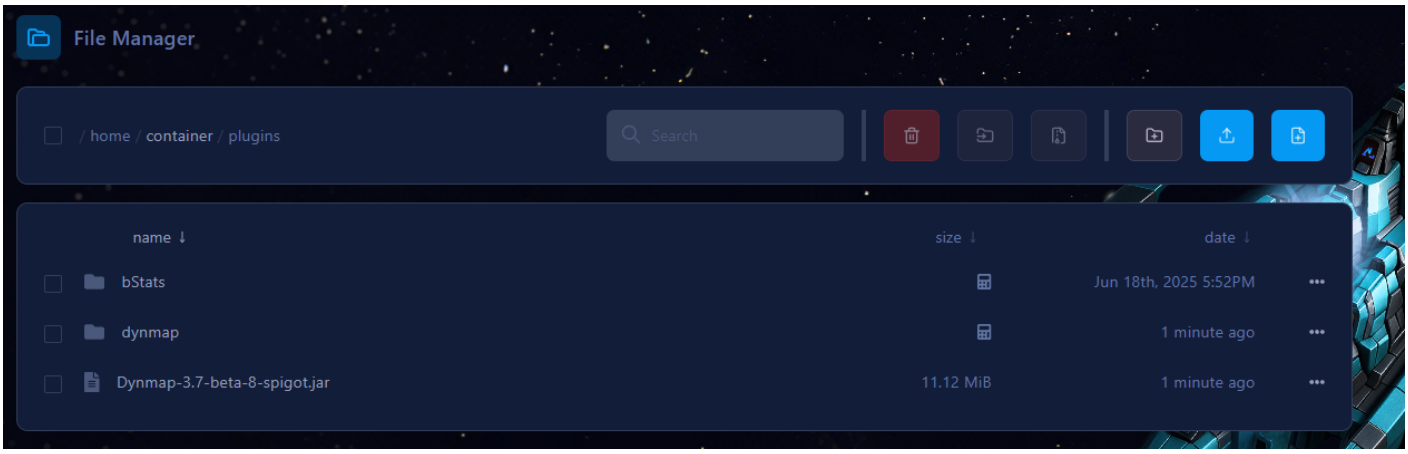

Installation

Download dynmap

Upload it in the `plugins` folder, from the File Manager.

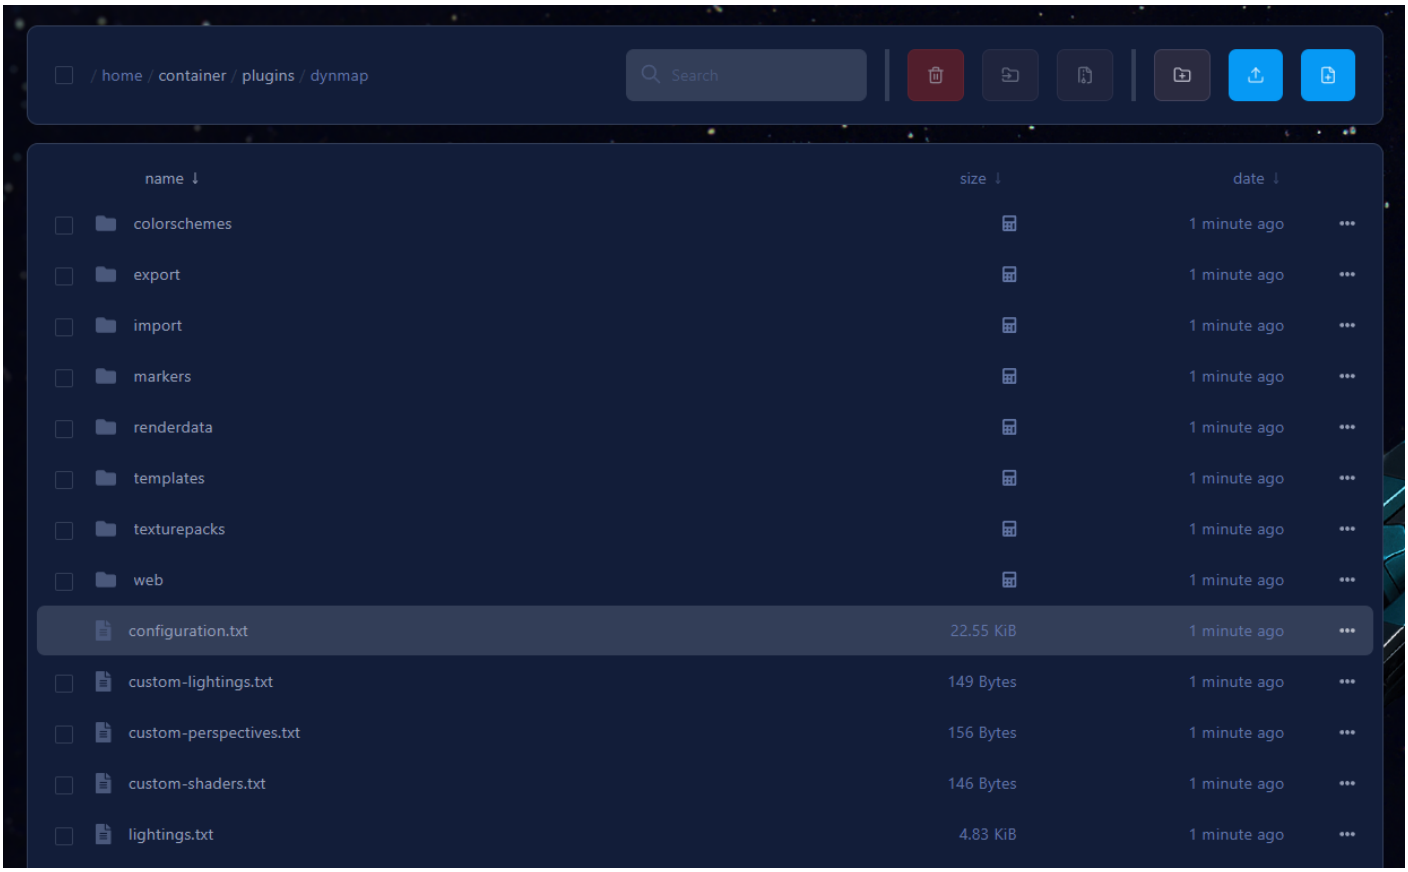

(Re)start the server to load the plugin. You'll know it loaded successfully if it generated a folder named "dynmap"

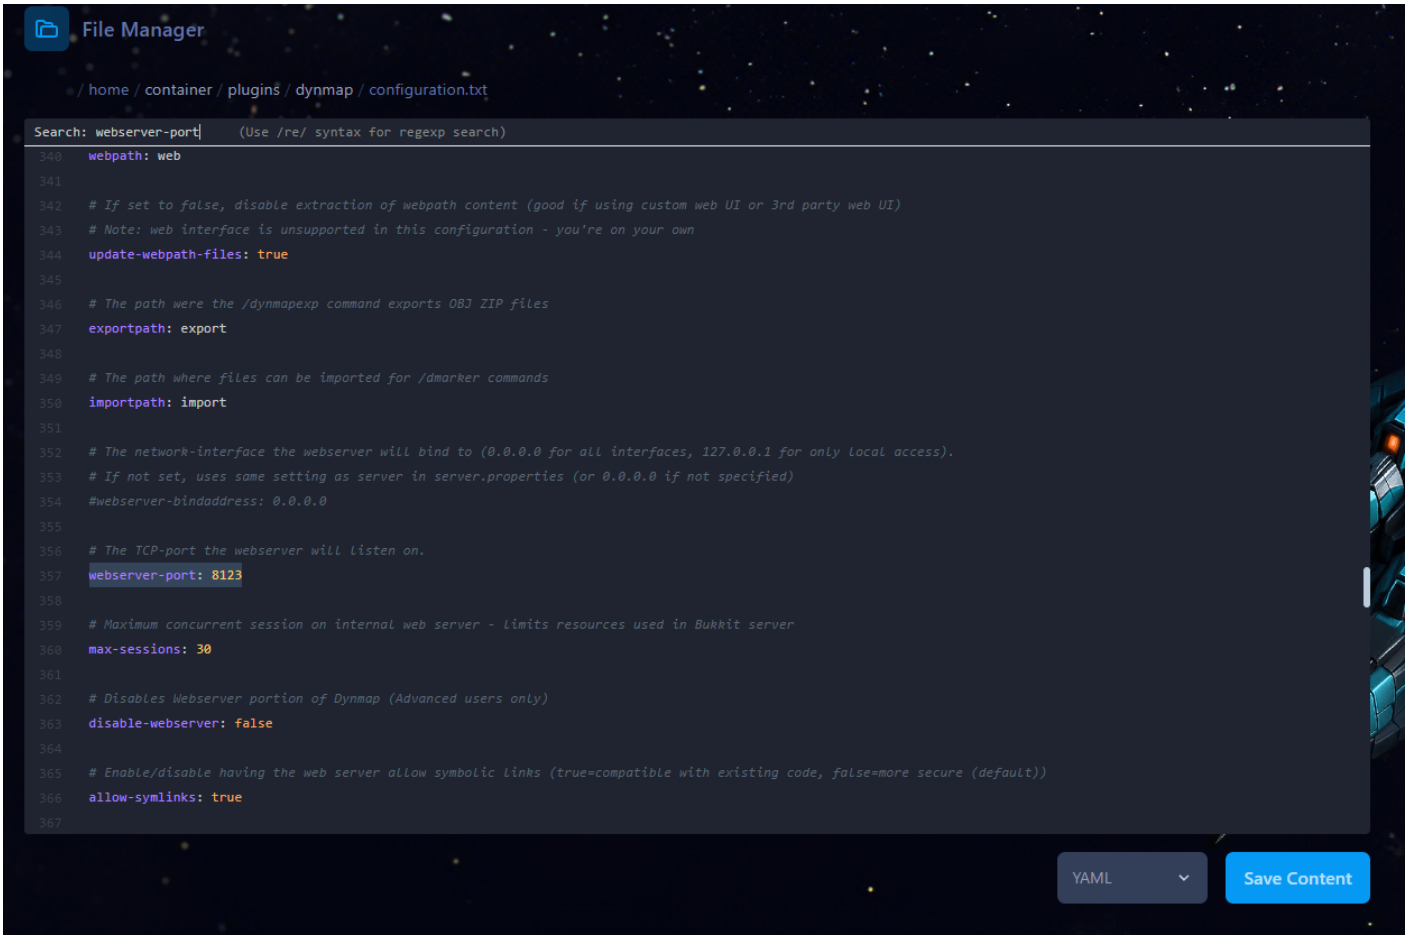

Web Server

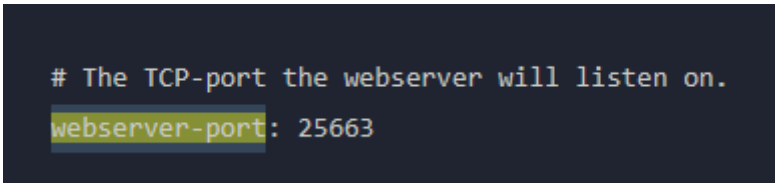

In the `Configuration.txt`, located at `plugins/dynmap/Configuration.txt`:

Find (use CTRL + F shortcut) `webserver-port` field within the file.

Change the port's value to your additional port allocation's value.

Restart the server to apply the changes
