Plan - Paper

What is Plan?

Plan is a plugin that provides detailed analytics for Minecraft servers, tracking player activity, server performance, and engagement. It features a web-based dashboard, multi-server support, and integrations with popular plugins. Ideal for monitoring server health, understanding player behavior, and improving retention, it helps server admins make data-driven decisions.

Requirements

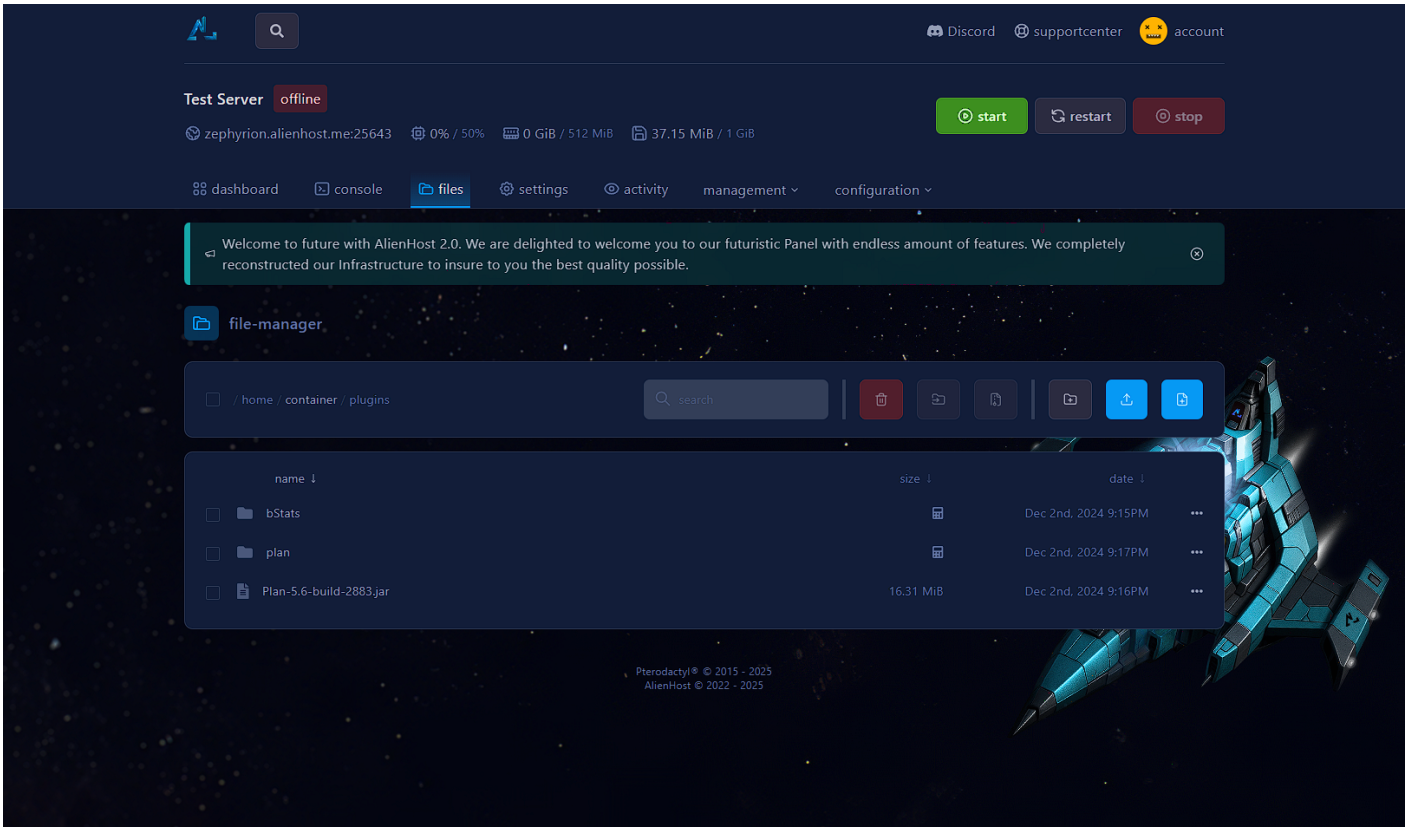

Additional port (or network allocation)

Java 11+

Installation

Download Plan

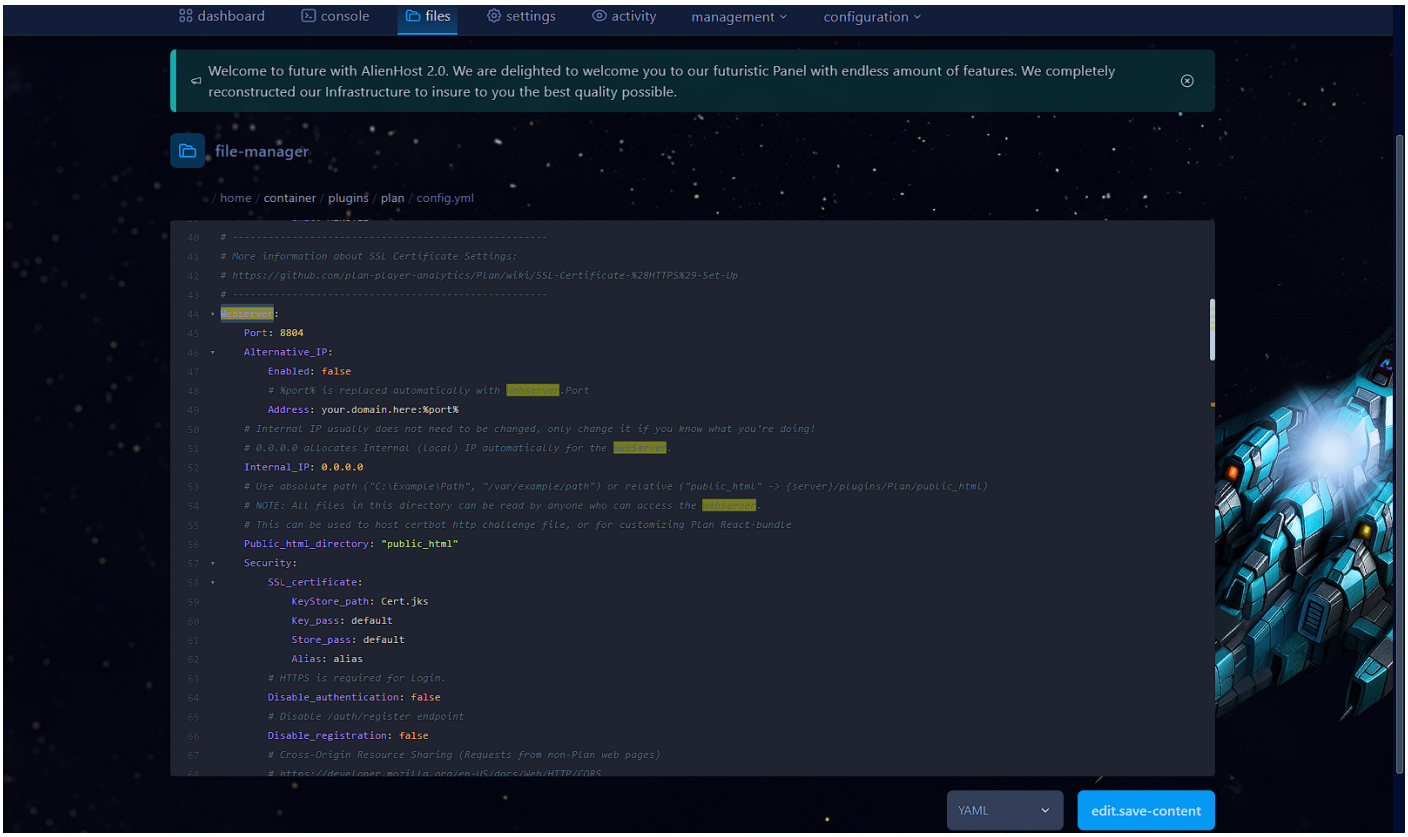

Place Plan.jar to the plugin directory through the file manager in the `plugins` folder

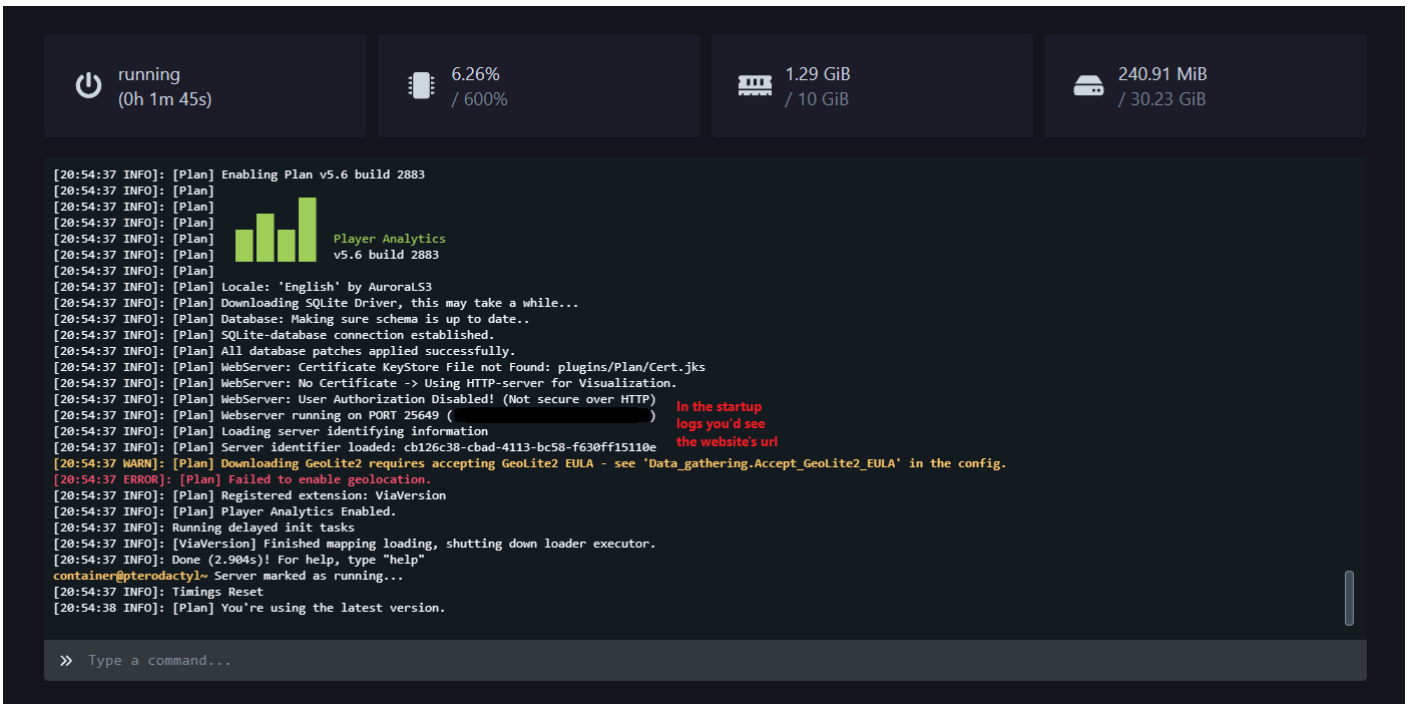

Restart the server to load the folders of the plugins.

The default port for the webserver set in the config is 8804 (line 44), change it to the one allocated in the **requirements** section.

Change the IP Address through Webserver.Alternative_IP field

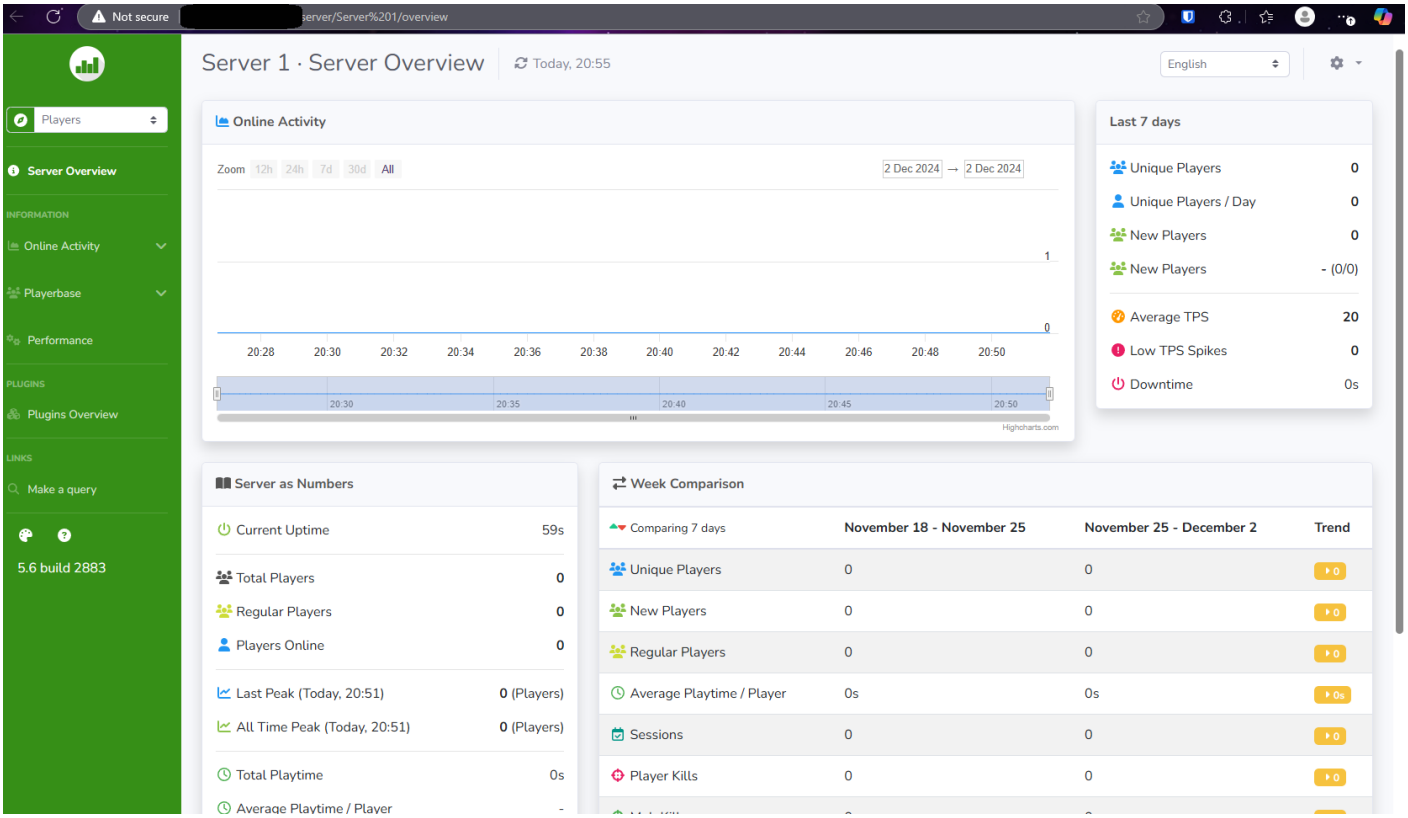

Restart the server

Access The Web Interface

Now go on your web browser and look for http://{yourdomain.com}:{port}

replace {yourdomain.com}:port with your server's actual domain/ip address and port
