

# Plan - Paper

## What is Plan?

Plan is a plugin that provides detailed analytics for Minecraft servers, tracking player activity, server performance, and engagement. It features a web-based dashboard, multi-server support, and integrations with popular plugins. Ideal for monitoring server health, understanding player behavior, and improving retention, it helps server admins make data-driven decisions.

## Requirements

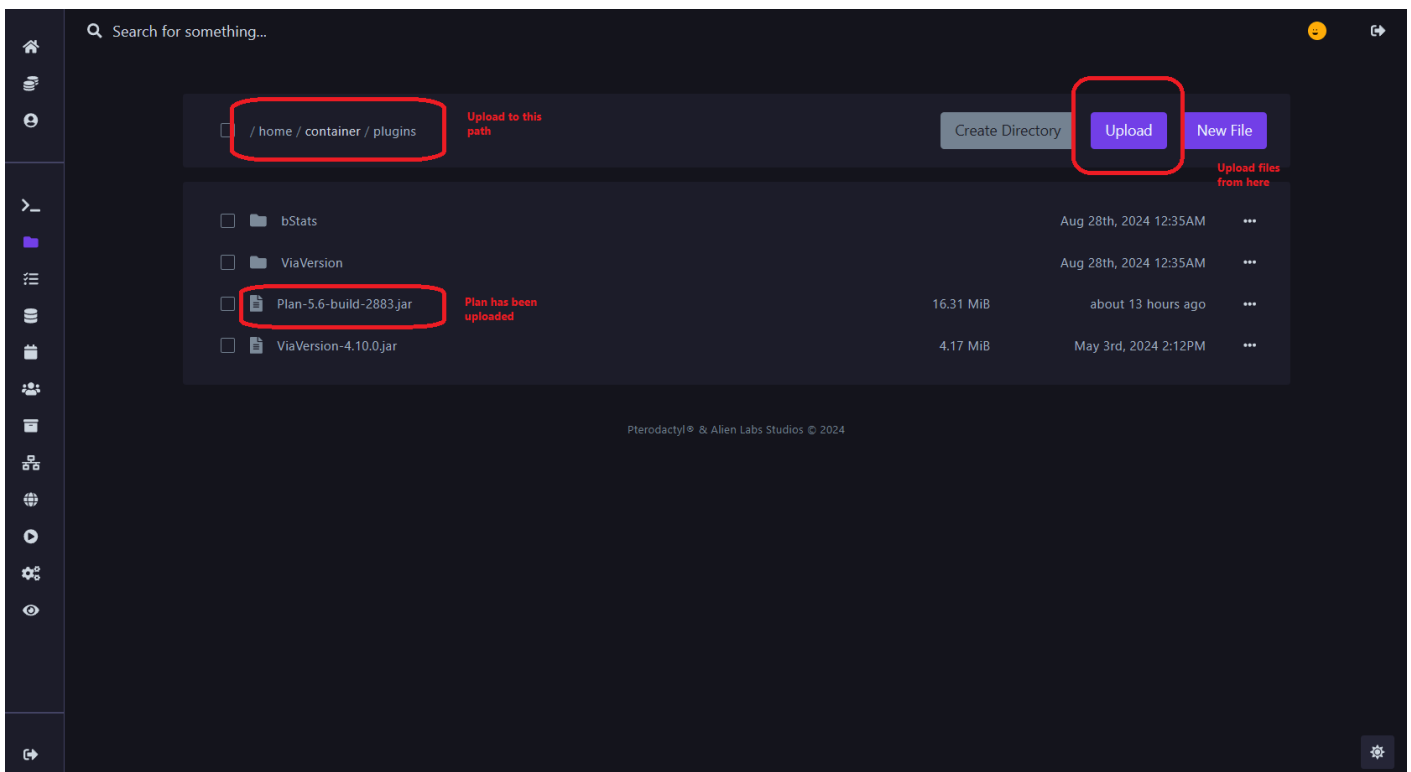

Additional port (or network allocation)

Java 11+

## Installation

Download Plan

Place Plan.jar to the plugin directory through the file manager

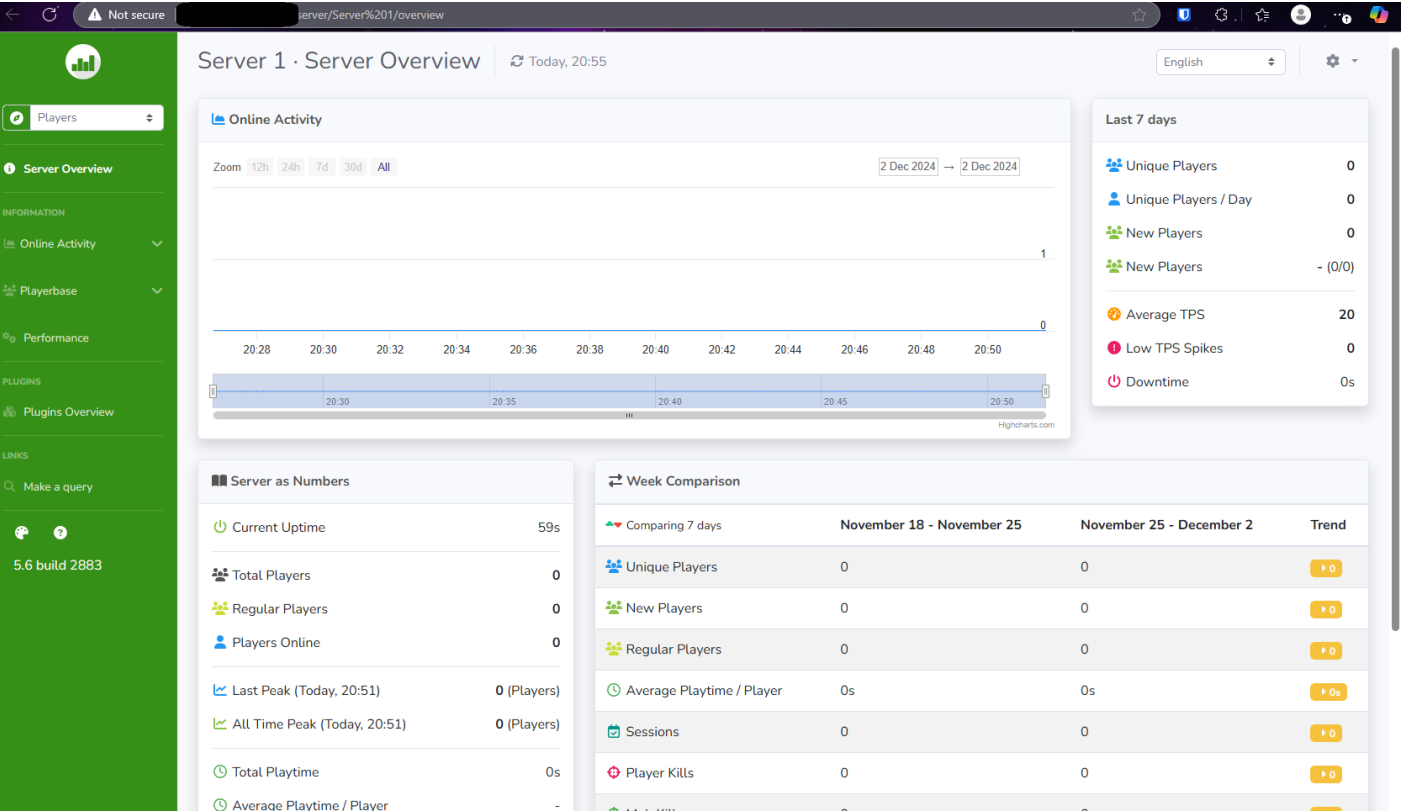

Restart the server to load the folder

## Change the IP Address through Webserver.Alternative\_IP field

Now go on your web browser and look for `http://{yourdomain.com}:{port}`

replace {yourdomain.com}:port with your server's actual domain/ip address and port
