

# Standalone (Spigot/Paper & Forks)

## 1. Download

Download [Simple Voice Chat \(Bukkit\)](#)

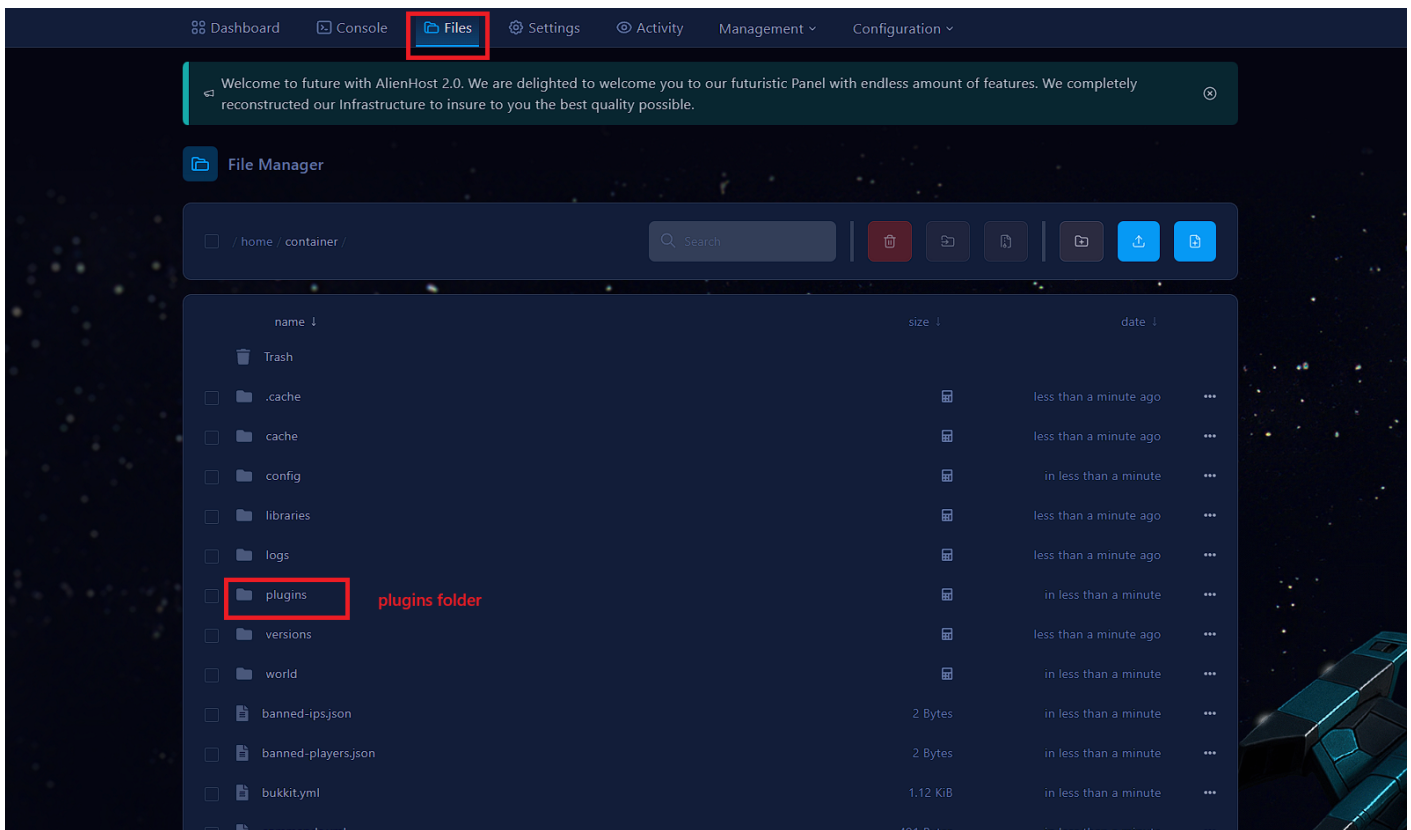

You need the Fabric/Forge version on your client

You need an [extra port allocation](#)

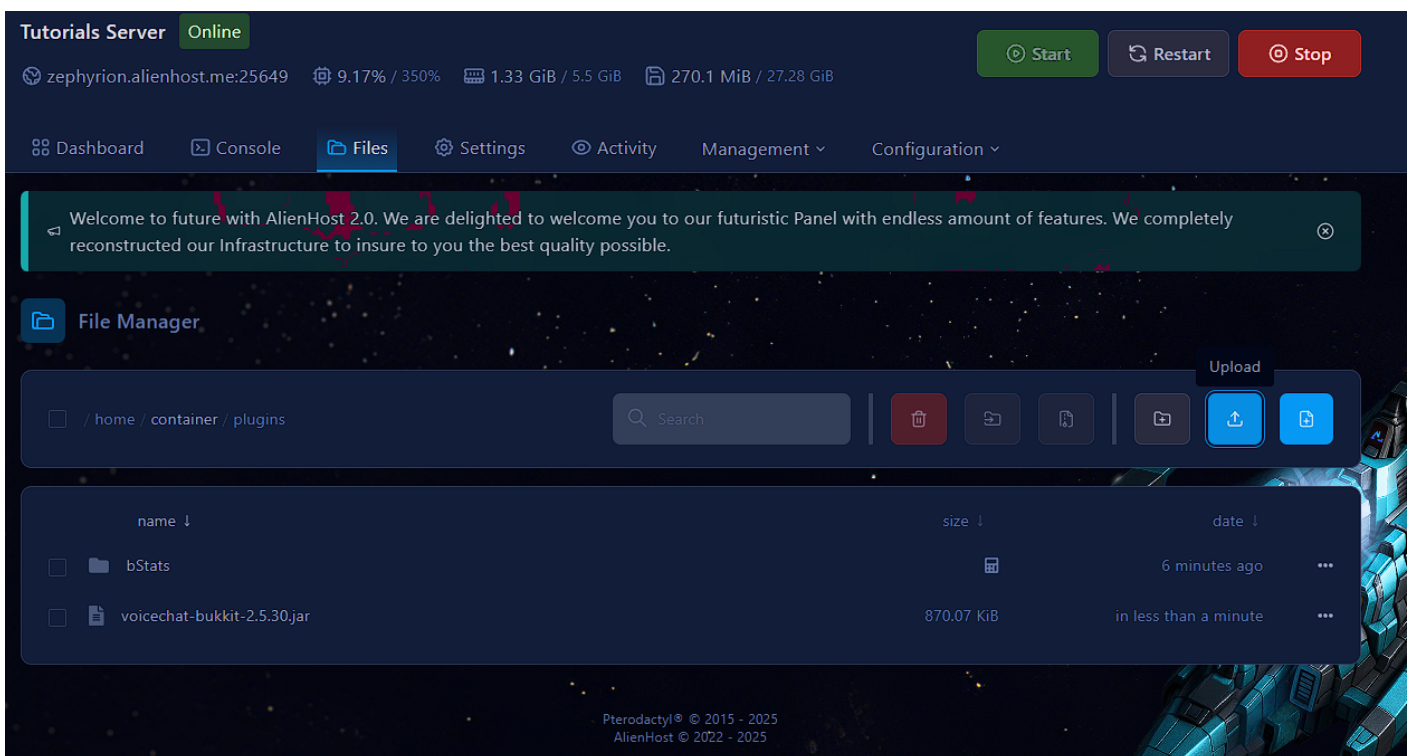

## 2. Login & Place The Plugin

Log in the [panel](#)

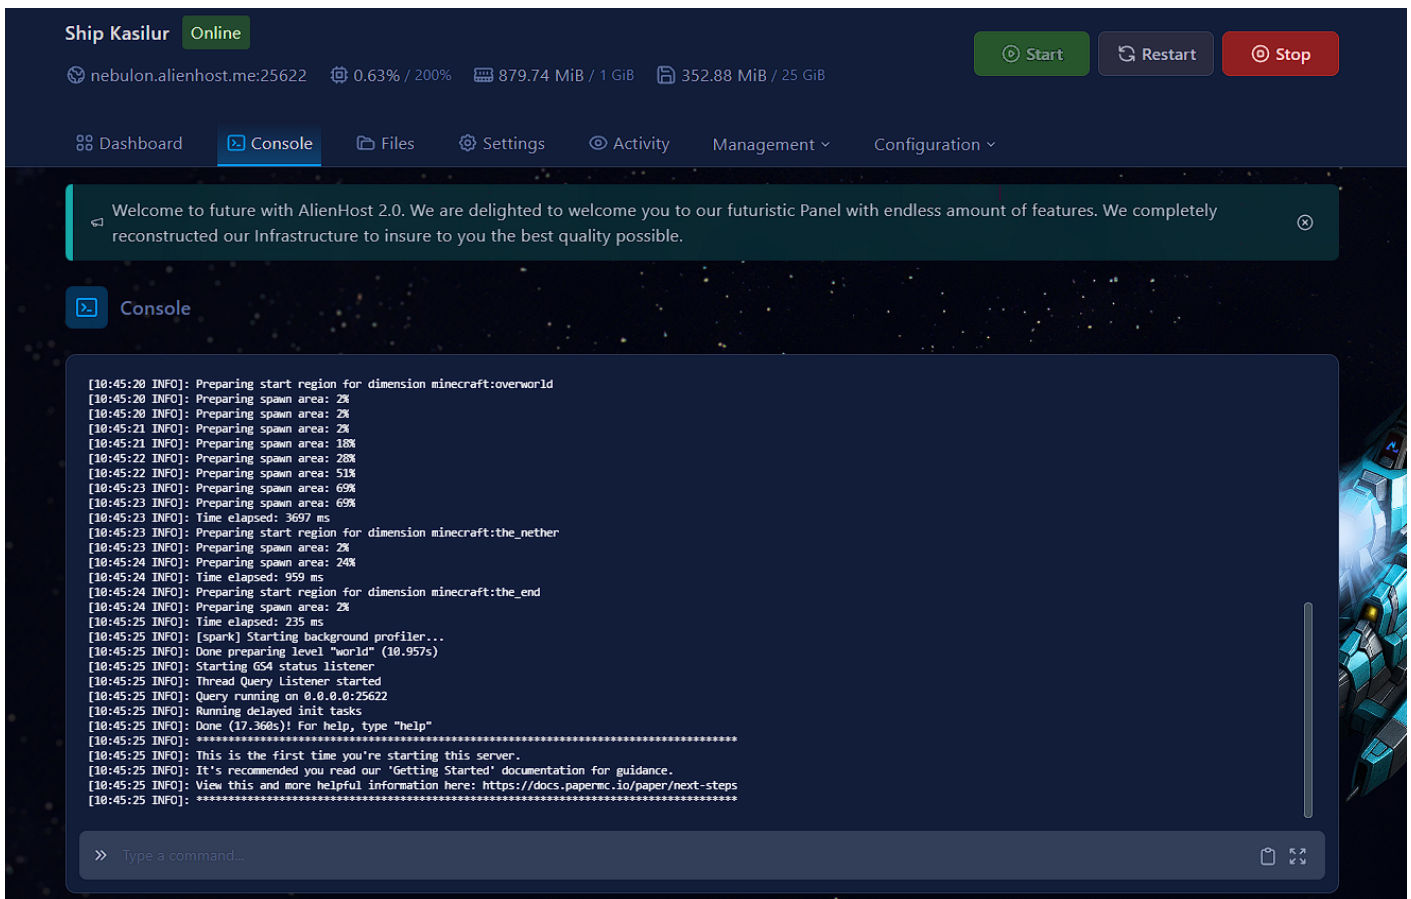

1. Go in the file manager
2. click on the folder named "plugins"

2a. Inside the plugins folder upload the file:

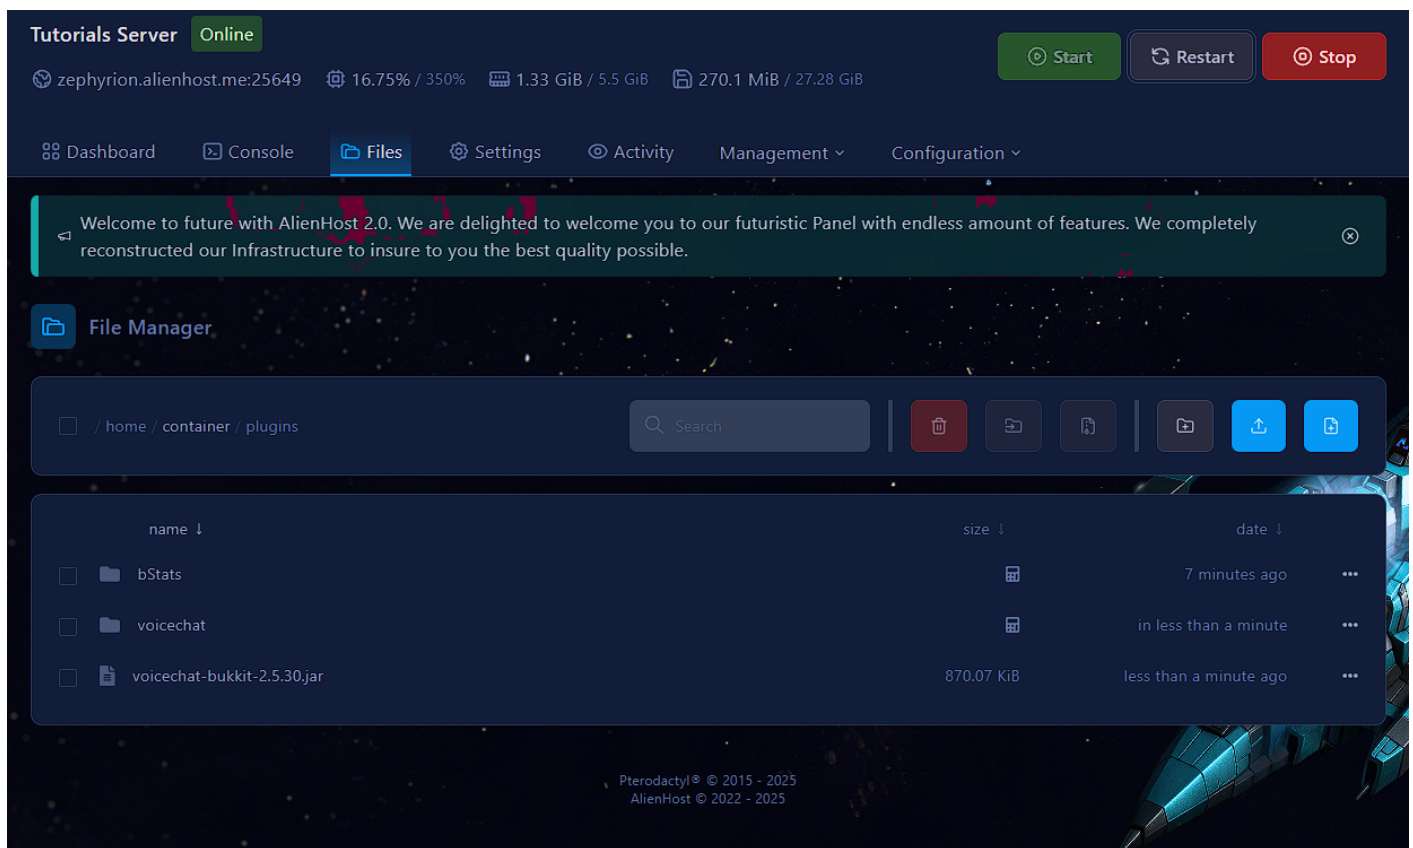

2b. Restart the server in the console tab

2c. Return to the plugins folder as you did in step 2.

## 3. Configuring

In the plugins folder, you should now see a "voicechat" folder. Click on it

Inside you'll find the file "voicechat-server.properties", click on it

On line 5 you'll find the port variable and a predefined value (24454) change it to the [extra port allocation](#) you made, change the port variable's value to your extra port.
